

CENTURION I HIGH-VOLUME

Single Housing Assembly

PETROLEUM

FILTER TECHNOLOGY FOR PETROLEUM PRODUCTS

MODEL: CENTURION I

Application

- Designed for high-volume service station applications, commercial fueling centers, marine fueling centers, agricultural fueling, and truck stop fueling centers
- Filter housings and replaceable elements are compatible with gasoline, diesel, methanol and ethanol blends up to 10%, biodiesel up to B20, and ultra-low sulfur diesel (ULSD)
- Filter housings may be used in hydraulic oil applications

Design Features

- 30 gpm (113 lpm) maximum flow
- Standard 1" NPT inlet/outlet flow area
- Elements are available in 10 and 30 micron paper for particulate removal
- Elements are available in 10 and 30 micron Hydrosorb® media for water detection and particulate removal
- Elements are available in 2 micron Cellulose/Microglass blend for longer life of particulate removal
- Equipped with a draincock for easy drainage of captured contaminants

Centurion I w/Adaptor

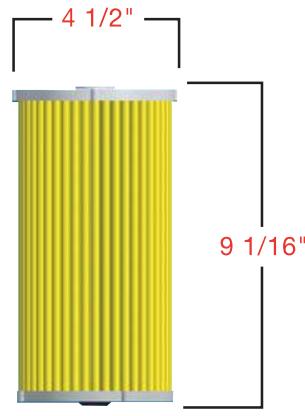

Benefits

- Demonstrated extended equipment life
- Assures delivery of quality fuel
- Cleaner change-out with draincock design
- Eco-friendly reusable housing

Ordering Information

Part No.	Model	Description
40001	Single Adaptor	Housing Kit Consisting of Adaptor, Housing, Washer, Acorn Nut, and Draincock. Element Not Included. (1" NPT Inlet/Outlet)

Centurion I Elements

Part No.	Model No.	Description
30065	E02	Element for Particulate Removal. High-Performance 2 Micron Microglass/Cellulose Media Blend.
30002	E10	Element for Particulate Removal. 10 Micron Cellulose Media.
30004	E30	Element for Particulate Removal. 30 Micron Cellulose Media.
30033	EHS-10	Element for Water Detection and Particulate Removal. 10 Micron Hydrosorb® Media.
30036	EHS-30	Element for Water Detection and Particulate Removal. 30 Micron Hydrosorb® Media.
30195	E-10M	Element for Particulate Removal. 10 Micron High Performance Microglass Media.

NOTE: 1. Element includes gaskets, washer, and filter element.

2. Filters are not to be used with aviation applications.

Adaptor Part No.

CENTURION II HIGH-VOLUME Double Housing Assembly

PETROLEUM

FILTER TECHNOLOGY FOR PETROLEUM PRODUCTS

MODELS: CENTURION II

Application

- Designed for high-volume service station applications, commercial fueling centers, marine fueling centers, agricultural fueling, and truck stop fueling centers
- Filter housings and replaceable elements are compatible with gasoline, diesel and ultra-low sulfur diesel (ULSD), but may NOT be used with methanol, methanol blended fuels, or oils when coalescing element used
- Filter housings may not be used in hydraulic oil applications
- Staged filtration applications

Design Features

- 30 gpm (113 lpm) maximum flow
- Standard 1" NPT inlet/outlet flow area
- Elements are available in 10 and 30 micron paper for particulate removal
- Elements are available in 10 and 30 micron Hydrosorb® media for water detection and particulate removal
- Elements are available in 2 micron Cellulose/Microglass blend for longer life
- Equipped with a draincock

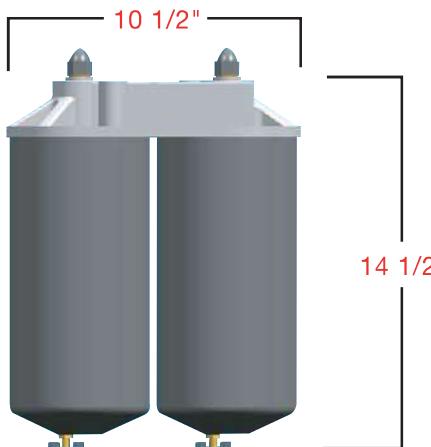

Centurion II w/Adaptor

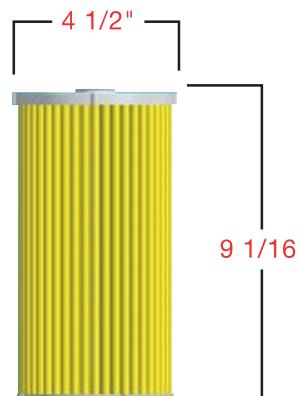

Benefits

- Demonstrated extended equipment life
- Assures delivery of quality fuel
- Cleaner change-out with draincock design

Ordering Information

Part No.	Model	Description
40008	Double Adaptor	Housing Kit Consisting of Adaptor, Housing, Washer, Acorn Nut, and Draincock. Element Not Included. (1" NPT Inlet/Outlet)

Centurion II Elements

Part No.	Model No.	Description
30065	E02	Element for Particulate Removal. High-Performance 2 Micron Microglass/Cellulose Media Blend.
30002	E10	Element for Particulate Removal. 10 Micron Cellulose Media.
30004	E30	Element for Particulate Removal. 30 Micron Cellulose Media.
30033	EHS-10	Element for Water Detection and Particulate Removal. 10 Micron Hydrosorb® Media.
30036	EHS-30	Element for Water Detection and Particulate Removal. 30 Micron Hydrosorb® Media.
30005	Stage I	* Centurion II Coalescing Element

NOTE: 1. * It is recommended that the Centurion II Coalescing Element be used in **Stage I** followed by a standard Centurion element in **Stage II**.
 2. Element includes gasket, washer, and filter element.
 3. Filters are not to be used with aviation applications.
 4. Centurion II requires two elements.

Adaptor Part No.	Description	Dimensions
90013	Material: Aluminum adaptor Used on: Centurion II Inlet/Outlet ports: 1" NPT	<p>10 1/2"</p> <p>2 1/8"</p> <p>1" NPT BOTH SIDES</p>

CENTURION III

HIGH-VOLUME

Dual Housing Parallel Flow

PETROLEUM

FILTER TECHNOLOGY FOR PETROLEUM PRODUCTS

MODEL: CENTURION III

Application

- Designed for high-volume service station applications, commercial fueling centers, marine fueling centers, agricultural fueling, and truck stop fueling centers
- Filter housings and replaceable elements are compatible with gasoline, diesel, methanol and ethanol blends up to 10%, biodiesel up to B20, and ultra-low sulfur diesel (ULSD)
- Filter housings may be used in hydraulic oil applications
- Parallel flow applications

Design Features

- 60 gpm (227 lpm) maximum flow
- Standard 1 1/2" NPT inlet/outlet flow
- Elements are available in 10 and 30 micron paper for particulate removal
- Elements are available in 10 and 30 micron Hydrosorb® media for water detection and particulate removal
- Elements are available in 2 micron Cellulose/Microglass blend for longer life
- Equipped with a draincock

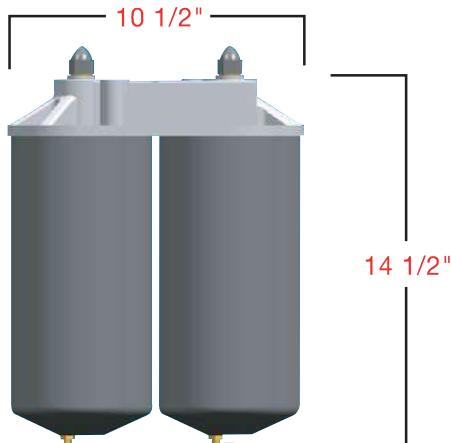

Centurion III w/Adaptor

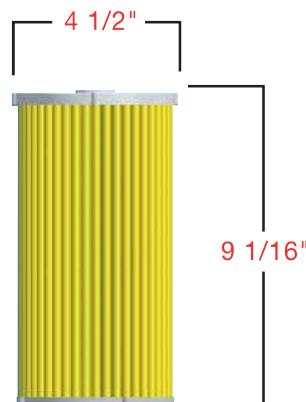

Benefits

- Demonstrated extended equipment life
- Assures delivery of quality fuel
- Cleaner change-out with draincock design
- Eco-friendly reusable housing

CENTURION IV HIGH-VOLUME

Three Element Parallel Flow

PETROLEUM

FILTER TECHNOLOGY FOR PETROLEUM PRODUCTS

MODEL: CENTURION IV

Application

- Designed for high-volume service station applications, commercial fueling centers, marine fueling centers, agricultural fueling, and truck stop fueling centers
- Filter housings and replaceable elements are compatible with gasoline, diesel, methanol and ethanol blends up to 10%, biodiesel up to B20, and ultra-low sulfur diesel (ULSD)
- Filter housings may be used in hydraulic oil applications
- Triple parallel flow applications

Design Features

- 90 gpm (340 lpm) maximum flow
- Standard 2" NPT inlet/outlet flow
- Elements are available in 10 and 30 micron paper for particulate removal
- Elements are available in 10 and 30 micron Hydrosorb® media for water detection and particulate removal
- Elements are available in 2 micron Cellulose/Microglass blend for longer life
- Equipped with a draincock for easy drainage of captured contaminants

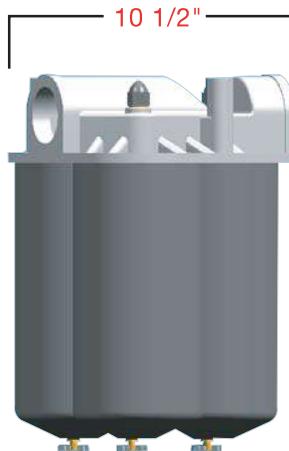

Centurion IV w/Adaptor

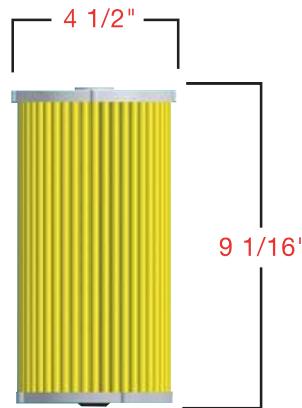

Benefits

- 90 gpm flow capacity
- Demonstrated extended equipment life
- Numerous element options
- Assures delivery of quality fuels

Centurion IV Elements

Part No.	Model No.	Description
30065	E02	Element for Particulate Removal. High Performance 2 Micron Microglass/Cellulose Media Blend.
30002	E10	Element for Particulate Removal. 10 Micron Cellulose Media.
30004	E30	Element for Particulate Removal. 30 Micron Cellulose Media.
30033	EHS-10	Element for Water Detection and Particulate Removal. 10 Micron Hydrosorb® Media.
30036	EHS-30	Element for Water Detection and Particulate Removal. 30 Micron Hydrosorb® Media.
30195	E-10M	Element for Particulate Removal. 10 Micron High Performance Micrgoglass Media.

NOTE: 1. Element includes gaskets, washer, and filter element.
 2. Consult Cim-Tek® Filtration for oil, methanol, and ethanol compatibility.
 3. Filters are not to be used with aviation applications.
 4. Centurion IV requires three elements.
